SPC SUMMARY

This fleet service report is a service SPC offers in order to stay ahead of problem or aging units under contract. It is designed to highlight areas of concern as well as determine how well your vendor is managing your fleet. Because of COVID-19, your volumes dropped by 37%, which likely has an effect on the number of service calls on your equipment for FY20.

Out of 272 units under contract with KMBS, there were 132 service calls on 65 copiers and printers during the fiscal year. Uptime for your fleet was 99.92%, which is excellent for the size of your fleet. SPC's bid specs require vendor to arrive within an average of four hours for service calls. However, each vendor calculates these figures differently. KMBS notes their average response time from call to arrival as 4.45 hours, which is slightly over the required average.

The average model age of your equipment is 5.88 years from date of intro, with 34 units more than 7 years from intro. As models get more than 7 years out from date of introduction parts become harder to locate and repair times may be longer.

Two units have more than 5 service calls for a variety of issues. Details on the two calls can be seen on the next page.
